ON REAL-TIME DATA SYNC

[Billing] is live, so as something changes in Azure, the **billing changes are reflected** through to ConnectWise. So, you can pretty much bill whenever you want, and you'll be accurate.

ON STREAMONE® OVERALL

I think StreamOne® ticks every box I can think of as far as being easy to use. I always used to need to be quite heavily involved in ordering, and it's been easy to train a few of our support staff. I don't really have to touch it at all now, so it's provided a lot of efficiency that we haven't had before.

ON STREAMONE® PSA CONNECTORS

The [PSA] integration we've been helping test, it's going to be a big change for our operations. We've had three different suppliers, and it leaves all the rest of them for dead. It's a **really nice, sleek integration** that is very easy to use, and works, which is important.

ON STREAMONE® BILLING

The StreamOne® exports for billing on the monthly basis now form a key process internally of how we bill our customers. **The data is always right, then we can bill our customers straight away** off the back of that data.

It really means that we're billing now as soon as we can. We're **getting that cash into the business earlier**, and it's reducing across the payment terms our cash negative flow because we've got that customer invoice data, and we can push that out as soon as possible.

Rosemary Brandt

Senior Buyer
Jigsaw24

SecOps Solution

How StreamOne®
is better

More than an
aggregation dashboard

Take immediate action
on data

Defend your Microsoft SMB customers against fraudulent cloud activities with an all-in-one view of their security posture.

MFA | Passwords | Budget Thresholds | Policies

Monitor

View **all** your customers' security status, threats and recommended actions.

Manage

Standardize deployment of security policies across your customer base.

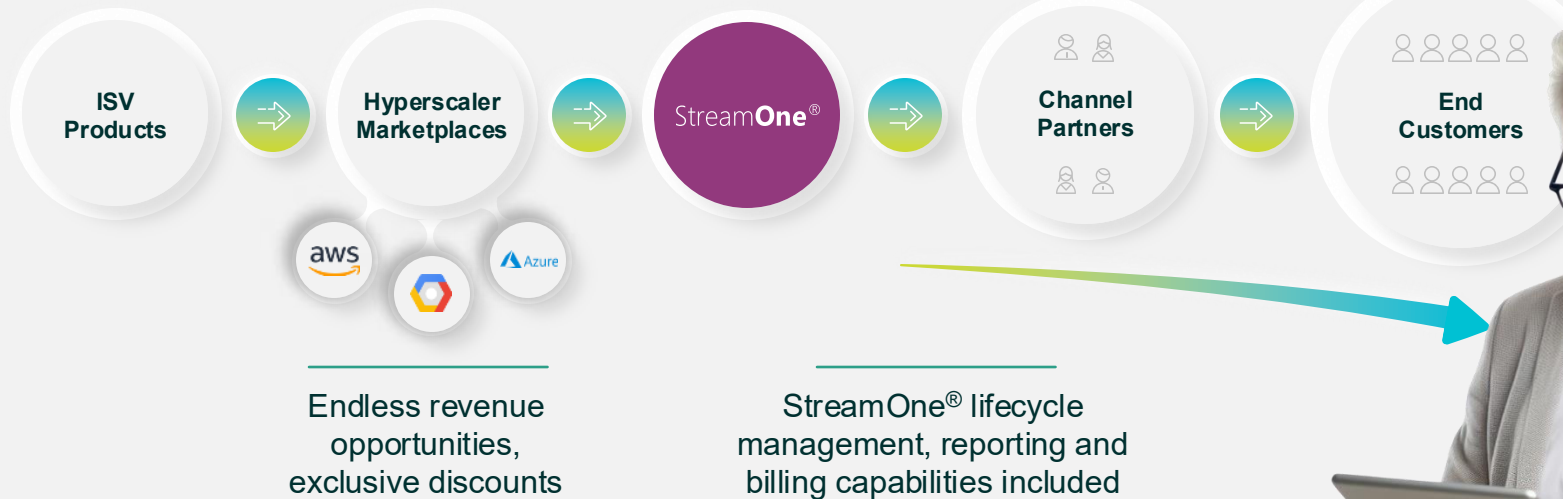

Implement

Recommend products to fill security gaps.

Simplify procurement processes for hyperscaler catalogs.

Thousands of products
at your fingertips

Add syndicated products to
your marketplace with a click

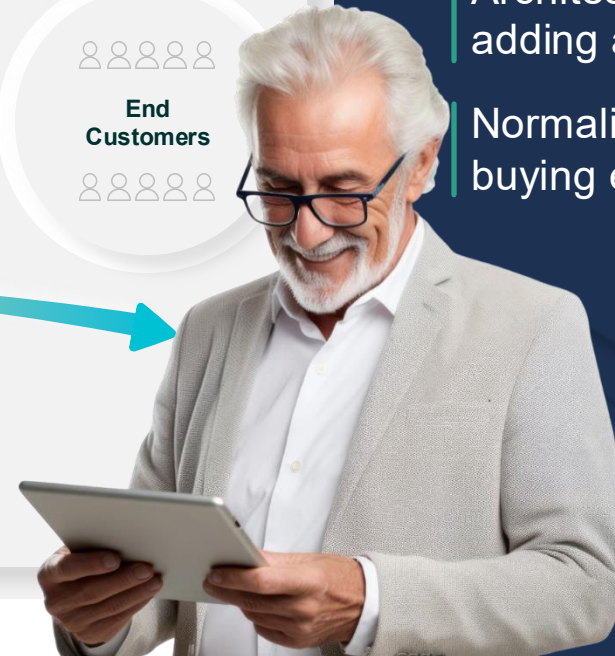

Marketplace syndication

How StreamOne®
is better

Architecture capable of
adding any marketplace

Normalization of the
buying experience

IDC's review on StreamOne®

On simplifying ecosystem complexity

No matter the vendor, StreamOne® normalizes all systems and processes and provides a **unified delivery model**

On digital journey enablement

StreamOne® is an agile digital platform that can evolve to **meet the continuing rapid pace of change**

On addressing partner challenges

StreamOne® can manage [pricing models and potential subscription changes] for partners, keeping **them up-to-date automatically in near real time**

On managed services providers

...can integrate easily with all elements of the StreamOne® platform to enable digital transformation and **revenue growth at scale**

New opportunity awaits

Solve cloud business needs

1
Reduce
complexity

2
Recognize higher
profitability

3
Deliver higher
customer value
